

I specialize in developing and optimizing LLM-based analytic solutions. I am adept at driving innovation by leveraging the latest in GenAI research to solve complex problems and enhance product development.

Data Scientist / AI Engineer

iQor sp. z o.o. / March 2023 - Present

Extensive experience architectd scalable AI systems; specializing in Agentic RAG and advanced In-Context Learning. I combine deep technical expertise in model optimization and fine-tuning with a LLMOps mindset to deploy production-ready applications. By leveraging emerging standards like MCP and staying ahead of market trends, I bridge the gap between cutting-edge research and high-impact business solutions.

Pricing Data Scientist

O-I BSC sp. z. o. o. / June 2021 - February 2023

Implementing cloud services into the teams' workflow. Developing and migrating automation processes in the cloud environment. Maintaining internal software and machine learning processes; reporting to key stakeholders.

Pricing data exploration, processing and analysis. Handling machine learning tasks, i.e. maintaining price forecasting projects. Preparing and presenting BI reports. Developing and sustaining internal software and automation processes. Managing simple, robust ETLs for data science tasks and reporting.

Spatial Data Analyst

Heksagon Research sp. z. o. o. / April 2021 - January 2022

Data gathering, exploration and processing. Preparing spatial analysis. Reporting to customers and key stakeholders. Visualizing data and spatial data. Organizing team's workflow.

TECHNICAL SKILLS

Python (LangChain, LlamaIndex, Pandas, Scikit-Learn, Tensorflow)
SQL, ChromaDB, R, Git, Docker, Azure DevOps, Jira, Confluence

Azure Data Factory, Azure Databricks, Azure Logic Apps
AWS EC2, S3, ECS/ECR, Bedrock, EKS, Lambda, RDS
MS Power BI, MS Power Automate

LANGUAGES

QGIS, ArcGIS, GeoPandas, Rasterio
Polish (native)
English (professional)
Russian (intermediate)

EDUCATION

Masters / Geoinformatics
Adam Mickiewicz University / July 2023
