CURRICULUM VITAE Bydgoszcz, Poland pacochp@gmail.com • github.com/JPacoch

Jakub *Pacocha*

Full-stack AI engineer with 6+ years of experience building production data systems, RAG architectures, and containerized ML infrastructure. Author of philosophical essays at *From the Cabinet*.

01 Professional Experience

Nov 2026 - Present

HERE Technologies

AI Systems

Lead AI Engineer

- Architecting scalable AI and location-aware data services for global mapping and spatial intelligence workflows.
- Building resilient production pipelines and containerized microservices with modern cloud infrastructure.

Python | AI Engineering | AWS

Mar 2023 - Oct 2026

iQor

Enterprise Generative AI & LLMOps

AI Engineer / Data Scientist

- Architected production-grade Retrieval-Augmented Generation (RAG) systems and optimized high-throughput vector search performance.
- Led the architectural transition toward agentic LLM workflows, containerized APIs (FastAPI / Docker), and AWS cloud deployment.

Python | AWS | LLMOps | RAG | Vector Databases | FastAPI

Jul 2021 - Feb 2023

O-I Poland

Predictive Analytics & MLOps

Data Scientist

- Developed, deployed, and maintained automated machine learning pipelines for internal global stakeholders on large-scale tabular sales and cost datasets.
- Streamlined feature engineering and model lifecycle monitoring on Microsoft Azure.

Python | Azure | MLOps | Tabular ML | SQL

Apr 2021 - Jan 2022

Heksagon Research

Civic & Municipal Geoinformatics

Spatial Data Analyst

- Analyzed complex spatial and demographic datasets, producing high-precision visualizations and analytical reports for private, civic, and municipal clients.

Python | GIS | SQL | Spatial Statistics

02 Technical Capabilities

AI & MACHINE LEARNING

- LLM Orchestration & RAG
- Vector Stores & Embeddings
- Agentic Workflows
- Prompt Engineering
- Computer Vision (CNNs)
- Classical ML

BACKEND & INFRASTRUCTURE

- Python (FastAPI, Flask)
- Docker & Containerization
- REST API Architecture
- SQL & Relational Databases
- C# / .NET Utilities
- React & Modern Web

CLOUD & DEVOPS

- Amazon Web Services (AWS)
- Microsoft Azure
- GitHub Actions CI/CD
- Linux Administration
- MLOps & Telemetry

SPATIAL & CIVIC SYSTEMS

- GIS & Geocomputation
- Transport Network Analysis
- Municipal Data Systems
- Geomorphological Vision Models

03 Academic Education

2022 - 2023

Adam Mickiewicz University in Poznań

Master of Science in Geoinformatics

Master's thesis focused on Deep Learning and Computer Vision (CNNs) applied to geomorphology and Earth sciences.

`Computer Vision` `CNN` `Python`

2018 - 2022

Adam Mickiewicz University in Poznań

Bachelor of Engineering in Geoinformation

Engineering thesis focused on creating a Python-based spatial network analysis tool for public transport.

`Python` `GIS` `Network Analysis`

2019 - 2020

Eötvös Loránd University (ELTE), Budapest

Engineering in Geoinformation (Erasmus+ Exchange)

International coursework in spatial data modeling, cartography, and geocomputation.

`Python` `GIS` `International Exchange`
